

Sustainable feed for sustainable food: global solutions for climate resilience and climate protection

– Event Program –

Start: 3:30 pm: Welcoming and introduction

Impulse presentation 1: *The EU approach contributing sustainable feed*

- Animal nutrition embedded in the F2F
- 2030 targets for sustainable food production
- Legislative actions concerning feed, green claims and labelling schemes

– Dr. Wolfgang Trunk –

Topic block 1: *Environment and efficiency: contribution of animal nutrition to reducing negative environmental impacts*

Impulse presentation 2: *Animal-based bioeconomy*

- The role of livestock in the agricultural food production system
- Assessment of the transformation of biomass into edible protein
- Perspectives for a more efficient and sustainable production of food of animal origin

– Prof. Dr. Dr. Wilhelm Windisch –

Impulse presentation 3: *Contribution of feeding to N and P circular economy*

- Circular economy: contribution of P- and N-reduced feeding
- Effect of feed conversion of compound feed on environmental impacts
- Benefits and limits of local sourcing of raw materials

– Dr. Gert van Duinkerken –

Impulse presentation 4: *Reduction of methane emissions from ruminants and their contribution to climate protection*

- Scientific perspectives to mitigate methane and impact on climate change
- Relevance of ruminants in the circular bioeconomy
- Perspectives to reduce methane emissions from ruminants

– Dr. Jan Dijkstra –

→ Survey for participants

→ Discussion

Topic block 2: *Responsibility and transparency: Improving sustainable raw material procurement and creating transparent, fair supply chains*

Impulse Presentation 5: *The brazilian soy production*

- Current outlook on brazilian agriculture and feed/food production including a strategy to reduce GHG emissions (Paris agreement)
- Latest assessment on transition to no-deforestation/conversion- free soy production

– André Nassar –

Impulse presentation 6: *Deforestation-free soy supply chains: an example of sustainability and voluntary commitments*

- Sustainability Charter
- Example of responsible supply chains (guidelines, deforestation-free).

– Asbjørn Børsting –

→ Discussion

→ Closing remarks

End: 4:30 pm: Deep Dives with the panel experts follow until 5:00 p.m.

Panelists:

- **Asbjørn Børsting**, President of the European Feed Manufacturers' Federation (FEFAC)
- **André Nassar**, Executive President of the Brazilian Association of Vegetable Oil Industries (ABIOVE)
- **Dr. Gert van Duinkerken**, Business unit manager, Wageningen Livestock Research
- **Dr. Jan Dijkstra**, Associate Professor in Ruminant Nutrition, Wageningen University
- **Prof. Dr. Dr. Wilhelm Windisch**, Professorship of Animal Nutrition at the TUM
- **Dr. Wolfgang Trunk**, DG SANTE/Animal Nutrition, Veterinary Medicines

Moderation: **Dr. Hermann-Josef Baaken**, Managing Director of the German Feed Association (DVT)

Conference language: English & German
